

A close-up photograph of a complex mechanical assembly, likely a watch movement. The image shows several interlocking gears of various sizes, some with teeth and others with smooth surfaces. A prominent purple lens or crystal is visible in the center. The lighting is warm and focused, creating highlights on the metal surfaces and a soft, blurred background. The overall composition is technical and detailed.

Serge Bourgeois – Senior Consultant

Mine engineer, Automation doctor

- ✦ Strong methodological background (project management, decision making, process reengineering, IT audit, quality management)
- ✦ Requirements documentation, integrated solution design and implementation (ERP, EDI, Web services),
- ✦ Change management
- ✦ Multiple-sites IT team management
